Node Express server

Create a new node project with the following parts:

Post request handler

- Gets a new person, and saves it to a json file (as an array of all the user)

- The new user needs to be valid. the validation rules are:

  - `age` - number (0-120)
  - `name` - string (3-15 chars) - *Must be unique*
  - `isMale` - boolean
  - `country` - string - must to be one of the values in this list:

```

- If the new user is valid - save him to the json file and return status 201 (created)

- If the new user is not valid - return status 400 (bad request)

Get request handler

Returns all the users from the file

Client Side

Create an html project with the following parts:

- `SignUp` - will contain a form to enter the details that are requiered to create a new user

  - `Add to the page a button to send the entered data to the server` (Post request)
  - `If the new user was added successfully , redirect the user to a new html page that displays the list of all the other user` (Get request)
